

BICYCLE PARKING

THAT REFLECTS YOUR VISION

Welcome to Madrax

Got Racks?

At Madrax, we are passionate about our bike racks. Since 1989, Madrax has been a premier manufacturer of heavy-duty, high-quality bicycle parking racks that are innovative, practical, and aesthetically pleasing. Our standards are rigorous, and each of our bicycle racks undergoes stringent quality testing before we put our name on one. It's the way we've done it for 25 years, and it's why Madrax is increasingly the bicycle rack of choice worldwide. As an added bonus, our wide choices of colors and styles combine both form and function to give you the greatest variety of racks from which to select. We are committed to being great at what we do, both for our customers and our products.

Committed to Keeping Green

Bike Green.

As a premier manufacturer of bike racks and bike parking systems, Madrax promotes "green" by encouraging biking as an integral part of society. Our bike racks are installed in schools, office complexes, parking garages, residences, hospitals, restaurants, hotels, and anywhere else people bike as a destination. Bicycling reduces the impact on the environment; a four mile trip by bike rather than a car keeps about 15 pounds of pollutants out of the air we breathe! Madrax creates bike racks and bike storage systems that make it easier for people to bike to work, school, and recreational activities.

Build Green.

Sustainability, especially environmental sustainability, is the key to our products. The steel used to manufacture our bike racks and site furnishings is produced in the United States using the basic oxygen furnace process. Recycled content, especially post-consumer recycled content, is an important feature of many green products. Our stainless steel bike racks are made of up to 90% recycled material.

Madrax products further meet the Green Standard by having exceptional durability and low maintenance requirements. Our bike racks are environmentally attractive because they do not need to be replaced as often, and their maintenance has a very low impact because harmful environmental chemicals are not needed to clean them. Moreover, the vendors we use for outsourcing are under 100 miles away from our plant.

Live Green.

We all impact the planet every day by virtue of being alive. At Madrax, we are committed to a responsible, environmentally aware manufacturing process for both our workers and our products. As a division of Graber Manufacturing, Madrax is a member of the U.S. Green Building Council, the nation's foremost coalition of leaders from across the building industry working to promote buildings that are environmentally responsible, profitable and healthy places to live and work. Our products support bike and pedestrian-friendly communities. In the community that is the greater world at large, we walk respectfully and take care to tread lightly on Mother Earth.

Bicycle Parking Guide

Overview

Biking is increasingly becoming the number one choice for alternative transportation and it is important to provide secure bicycle parking. By providing bicycle parking, you will be encouraging a healthy community and environment. Cyclists' bikes are precious and we get that! So we created some easy guidelines to help you design bicycle parking that is secure and functional.

Site Planning

The First thing in planning for bicycle parking is to figure out whether you need short-term parking or long-term parking.

Short term parking provides convenient and secure parking for a couple hours or less. Location of short-term parking should be near the main entrance of the building in a well-lit area. Bicycle racks should be 50 ft. from the entrance or closer than the nearest car parking stall. Short-term bicycle parking should be obviously visible from the entrance.

Long-term parking is best for commuters who must leave their bicycles for more than two hours. This is the most secure type of bike parking since bikes are protected from theft and weather conditions. Bike lockers are the most common and cost effective choice for long-term parking. Because long-term parking is usually located in low traffic areas, effective signage is recommended.

Choosing a Bicycle Rack

Not all bicycle racks are created equal. When selecting a bicycle rack, determine the appropriate user and where the bicycle racks will be installed. Ease of use, support of the bicycle, security, capacity, function, quality of materials and aesthetics are all considerations when purchasing bicycle racks.

When choosing a bicycle rack, make sure the rack is made out of high quality material. Choose a bike rack that supports the bicycle upright by its frame at two points; this prevents the front wheel from turning and the bicycle from tipping over. Make sure the frame and one or both wheels can be secured using a U-lock. For additional bicycle support use bicycle racks that have wheel wells.

Two Points of Contact

Frame and One or Both Wheels Secured Using a U-lock.

Wheel Wells for Additional Bicycle Support

Install Options

Racks must be securely anchored to the ground to prevent bike thieves from freeing the rack. There are three installation types: In Ground mount, surface mount, and Freestanding/rail mount.

In Ground: This is a permanent option where the bottom of the rack is encased in a concrete bed. This option is often used when installing on asphalt, grass or pavers.

Surface Mount: This is the most common option that has a flange plate with mounting holes anchored to an existing concrete pad. This option is not secure on asphalt or pavers.

Freestanding / Rail Mount

Surface Mount

Freestanding

Bicycle Parking Guide

Spacing Recommendations

CHECK YOUR LOCAL CODES.

Sidewalk Placement

There must be at least a six-foot clear walkway from the building, to comply with the Americans with Disabilities Act. The bicycle rack cannot be located directly in front of a store/building entrance or exit, nor in a driveway. The bicycle rack cannot be located closer to the curb than two feet. Three feet from the curb is ideal, although in certain circumstances, the distance may be greater.

If you have questions about whether a particular bicycle parking rack you are considering using meets any of these requirements, please contact Madrax customer service and consult your local regulations.

Brand Your Organization

Looking for a unique way to brand your organization, encourage cycling and support sustainability? Let Madrax help you deliver a clear message with our branding racks. Select a compatible rack, send us your logo, and in return our highly experienced engineers will send you a 3D-Rendering along with a quote... It's that simple!

Our products are individually shaped, formed and constructed, and personally inspected to meet your specifications. We'll always exceed your standards for quality, materials and craftsmanship.

Whim-Cycle™ Racks

imagine. inspire. create.

Whether you are seeking to transform your environment, or just express your creativity, our custom work is your best resource. We will work with your idea, your sketch, or your blueprint to bring your vision to life.

Our craftsmen have a wealth of experience in custom design work, from creating a shark bike rack with swimmers for Dublin, Ohio, and a smiley face rack for a customer in Orlando. We would like to do the same for you.

Contact us today about your custom needs. Let's work together to take your ideas from concept to creation.

For custom projects call
800-448-7931
 or e-mail us at sales@madrax.com.

Materials & Finishes

Our Mad Shield Finish provides a 5 year corrosion protection warranty by using a duplex system. This system produces steel products that are galvanized and then powder coated. Corrosion protection is superior to either protection system used alone. You will have superior corrosion protection and a wide variety of colors for your application. Our Mad Shield Finish will greatly extend the life of your product, significantly decrease maintenance cost and is environmentally friendly.

Materials

Galvanized and Powder Coated racks shall be constructed of ASTM A53 Structural Steel. Stainless Steel racks shall be constructed of ASTM A312 TP 304 Schedule 40 Stainless Steel.

Finish / Material:

- (-G) - Hot-Dipped Galvanized After Fabrication
- (-P) - Super TGIC Polyester Powder Coat Stocked Color (For Non-Stocked Colors an Additional \$250.00 Set Up Charge / Color Plus the Cost of Powder.)
- (-MS) - Madshield - Galvanized and Powder Coat
- (-T) - Thermoplastic Powder Coat Color (Same Price as (-P))
- (-S) - Stainless Steel
- (-PS) - Powder Coated Stainless Steel
- (-ES) - Electro Polished Stainless Steel
- (-VCC) - Plastisol Coating

Galvanized (-G)

Rack shall be hot-dipped galvanized after fabrication for a utility finish. The rack shall have vent holes for dipping into the hot molten zinc tank. The rack shall weather in appearance similar to a battleship grey color.

Vent Hole

Weathered

Mad Shield (-MS)

Rack shall be galvanized and then coated with an electrostatically applied super TGIC powder coat. The color shall be ____ (list color).

Finishes

NEW! Black Vinyl Cushion Coating (-VCC)

Rack shall be dip with a plastisol coating after complete fabrication. The color shall be black. Other colors available upon request.

Super TGIC Powder Coat (-P)

Rack shall be powder coated after complete fabrication with an electrostatically applied super polyester powder coating. The color shall be ____ (list color). To ensure powder coat adhesion, steel shall be free of any scale, paint, varnish, or rust. Substrate preparation prior to powder coating shall include a chemical wash and rinse followed with an iron phosphate treatment.

Thermoplastic Powder Coat (-T)

Rack shall be powder coated after complete fabrication with Thermoplastic polyethylene coating. The color shall be ____ (list color). To ensure powder coat adhesion, steel shall be free of any scale, paint, varnish, or rust. Substrate preparation prior to powder coating shall include a chemical wash and rinse followed with an iron phosphate treatment. (Thermoplastic is not available in all colors.)

Powder Coated Stainless Steel (-PS)

Rack shall be polished and then coated with an electrostatically applied super TGIC polyester powder. The color shall be ____ (list color).

Stainless Steel (-S)

Rack shall be polished to Satin #4.

Electro Polished Stainless Steel (-ES)

Rack shall be electro polished.

Stocked Super TGIC Powder Coat Color*

Note: Due to variations in the printing process, colors shown may not be an exact match. Please request color samples from Madrax for accurate color comparisons.

site furnishings for a Lifetime™

Creative craftsmanship.

For more than a decade, our craftsmen have been creating site furnishings that stand out for their stylish designs, broad palette of colors, and exceptional handcrafted quality.

Designs and finishes made to order.

You have more design options, also, with choices ranging from steel strap, perforated metal and steel rod to wood. Choose one family, or mix and match to create an environment that meets your unique needs.

Thomas Steele stands out for its finishes, a selection of incomparable beauty and variety. Select any item from the eight Thomas Steele design families, choose a finish, and we'll build it for you – custom craftsmanship every time. So explore our catalog. Expand your mind. Select the Thomas Steele furnishings that will fit your site just so.

e-Steele™ ... When FORM is not enough.

No matter how hard the use or how harsh the environment, this premier finish really stands up against pitting, staining and rusting.

Thomas Steele improves on the industry standard polyester powder finish by applying a "state-of-the-art" 18-step finishing process that includes sandblasting, zinc corrosion protecting, epoxy primer and TGIC Super-Durable Polyester powder coat. This is the superior process that is also earth friendly. Our unique e-Steele™ technology produces the most durable finish.

The result? Gleaming good looks and rugged durability, backed by an unsurpassed 5-year warranty.

TERMS AND CONDITIONS

All orders must be in writing and are subject to acceptance by Graber Manufacturing, Inc. All prices are FOB Graber Manufacturing's factory and are in U.S. dollars. Prices are subject to change without notice. Shipments will be made at prices prevailing at the time of the shipment.

Net is due 30 days from date of invoice when buyer is a tax-supported government entity or a company with approved credit. Other purchasers must pay a 50% deposit prior to fabrication with the balance due prior to shipment. Service charge is 1½% per month on all invoices after 30 days. Graber Manufacturing also honors American Express, MasterCard and VISA. Graber Manufacturing reserves the right to change terms if necessary.

Graber Manufacturing reserves the right to discontinue or change the design and specification of units, and to ship the revised product without notice when such changes have been made.

For additional terms and conditions contact your local Madrax representative or Graber Manufacturing.

LIMITED WARRANTIES

Madrax division of Graber Manufacturing. ("Madrax") warrants products it manufactures against defects in materials or workmanship for a period of one year from the date of invoice.

Hot dipped galvanized and stainless steel products are warranted against corrosion for a period of five years from the date of invoice. All Madrax products (excluding bicycle lockers) are warranted against structural failure for a period of twenty years from the date of invoice. Bicycle lockers are warranted against structural failure for a period of one year from the date of invoice.

Superficial wear or damage such as scratches, nicks or dents caused by normal wear and tear are not covered by this warranty. These warranties do not cover any defects or failure due to vandalism, negligence, abuse, accidents, lack of maintenance or improper installation. Unless previously approved, in writing by Graber Manufacturing, this warranty does not cover any defects or failure due to products tampered with or altered, modified or repaired by anyone.

For additional specific conditions and limitations, contact your local Madrax representative or Graber Manufacturing.
